Welcome to the Stones River ARC's
Amateur Radio Challenge Course

Upon arrival with your equipment, you will be given a copy of the **Incident Radio Communications Plan (ICS-205)**. The **IRCP** details how to contact Net Control from the various Objective Checkpoints in the Challenge Course.

At each Objective location, operators will program the proper frequency/tone/offset and contact Net Control to receive instructions for completing the Objective. Once an Objective is completed, Net Control will direct operators to the next Objective.

EXAMPLE EXCHANGE:

Operator: "Net Control, this is CALLSIGN."

Net Control: "CALLSIGN, this is Net Control. Go ahead with your traffic."

Operator: " CALLSIGN is on site at Objective #1. Standing by for instructions."

Net Control: "CALLSIGN, this is Net Control. To complete Objective #1, please perform the following task(s) [...]."

Operator: "Net Control, this is CALLSIGN. [...]."

Net Control: "CALLSIGN, this is Net Control. Objective #1 is complete. Please proceed to Objective #2."
